### TRADITIONS OF LANDSCAPE ARCHITECTURE

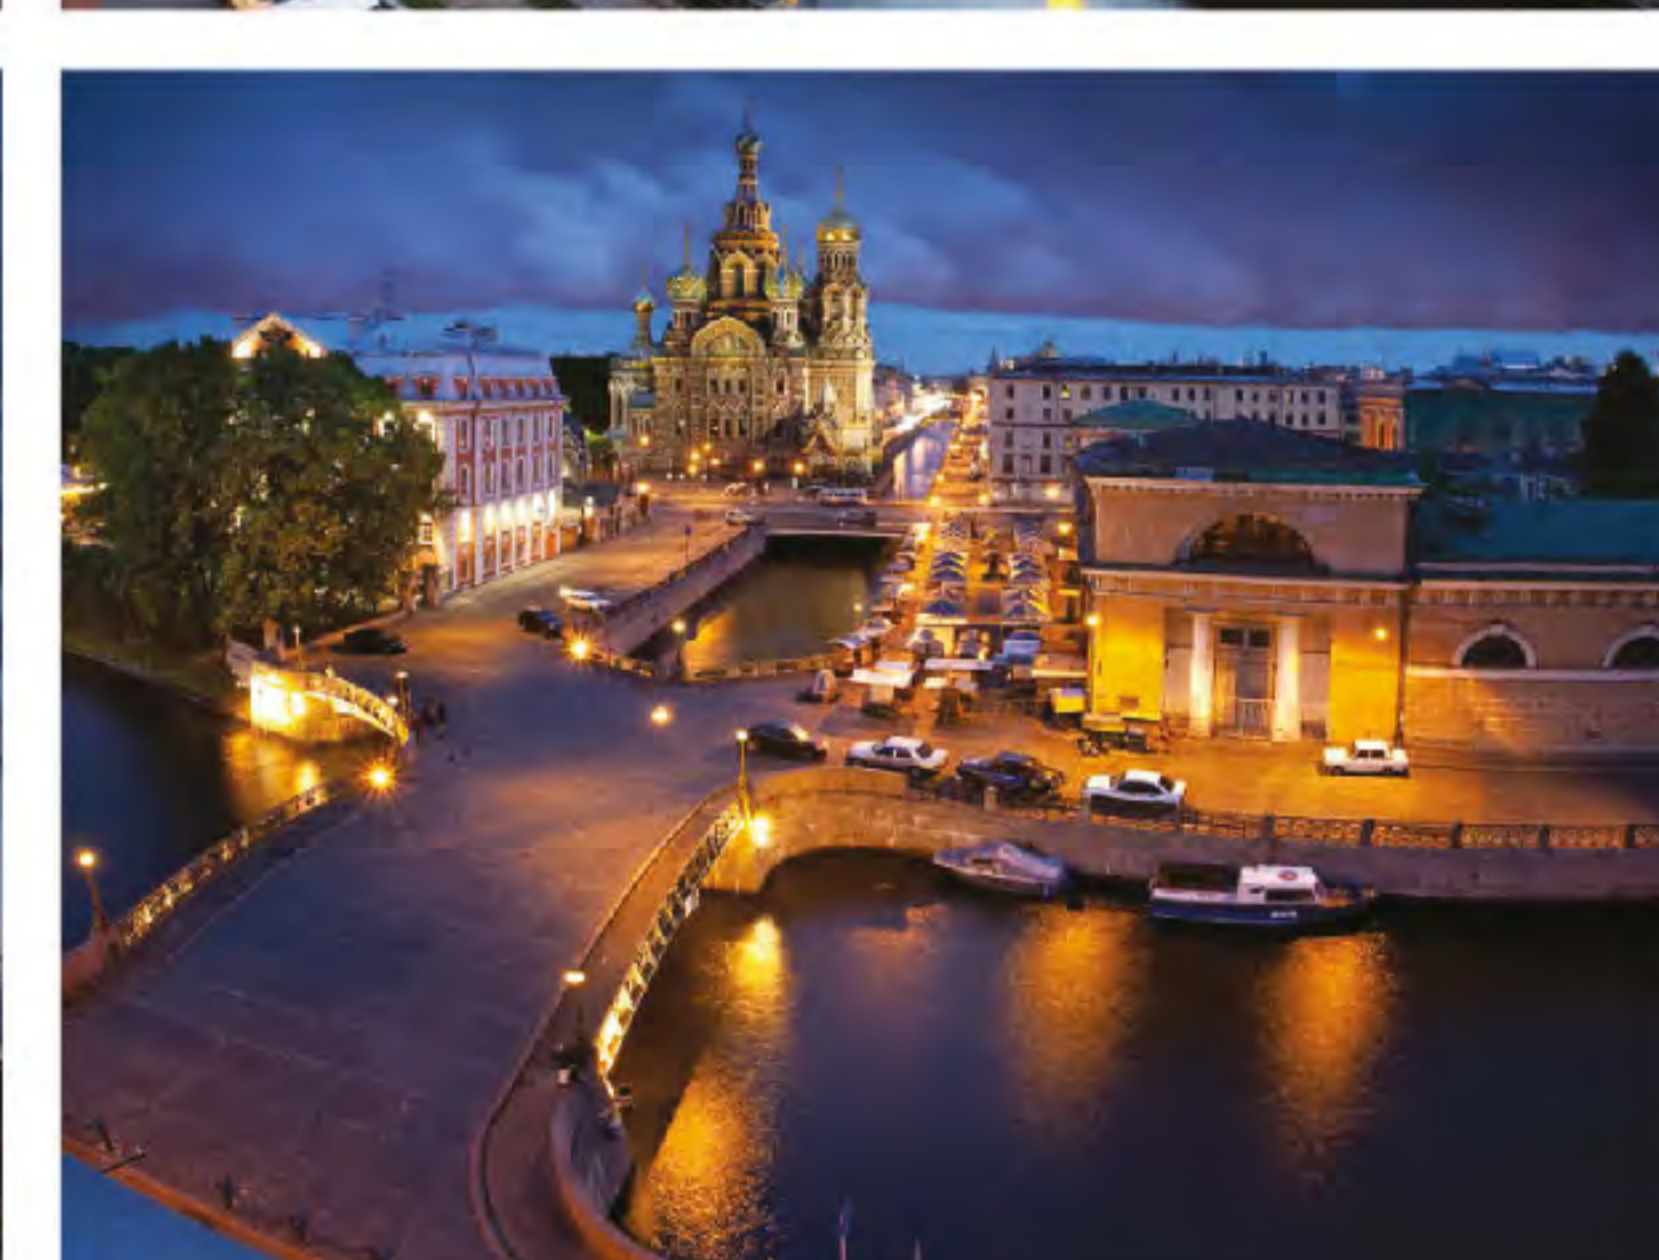

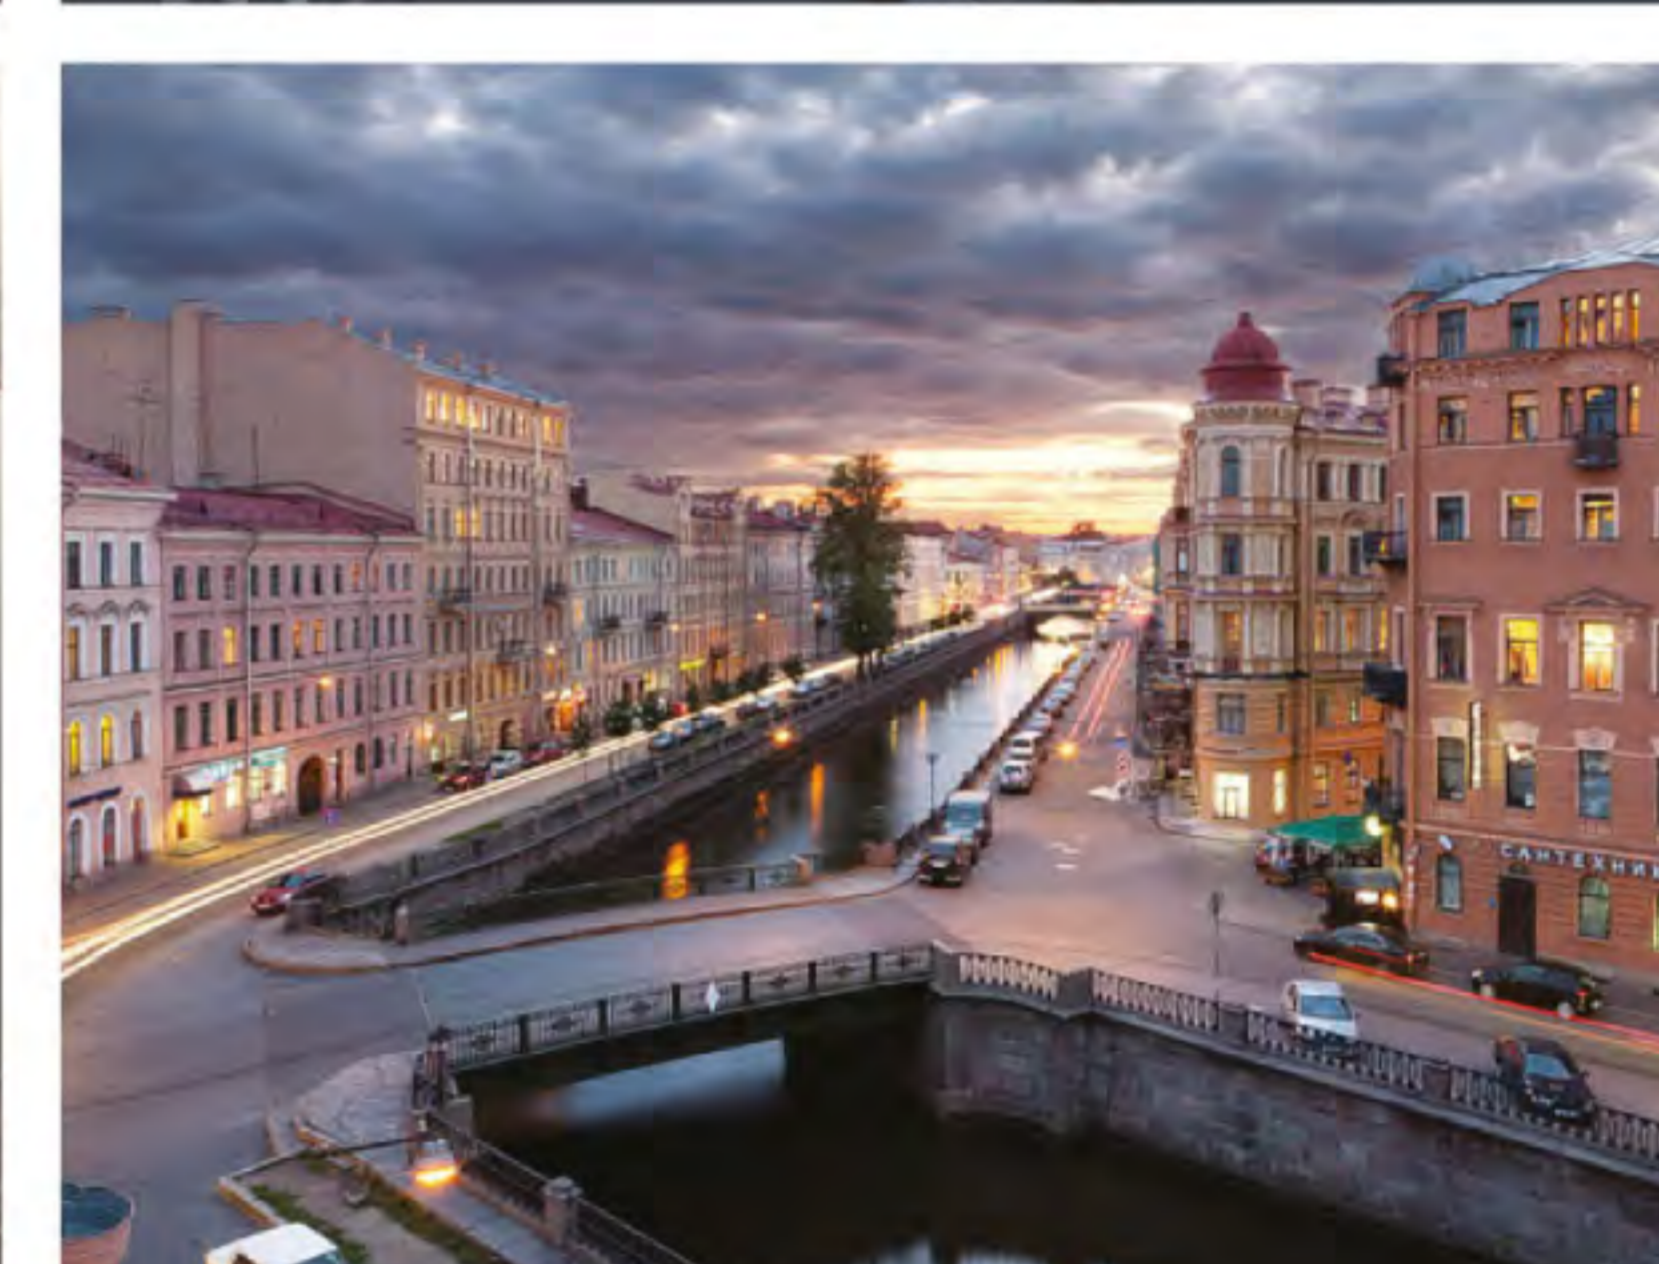

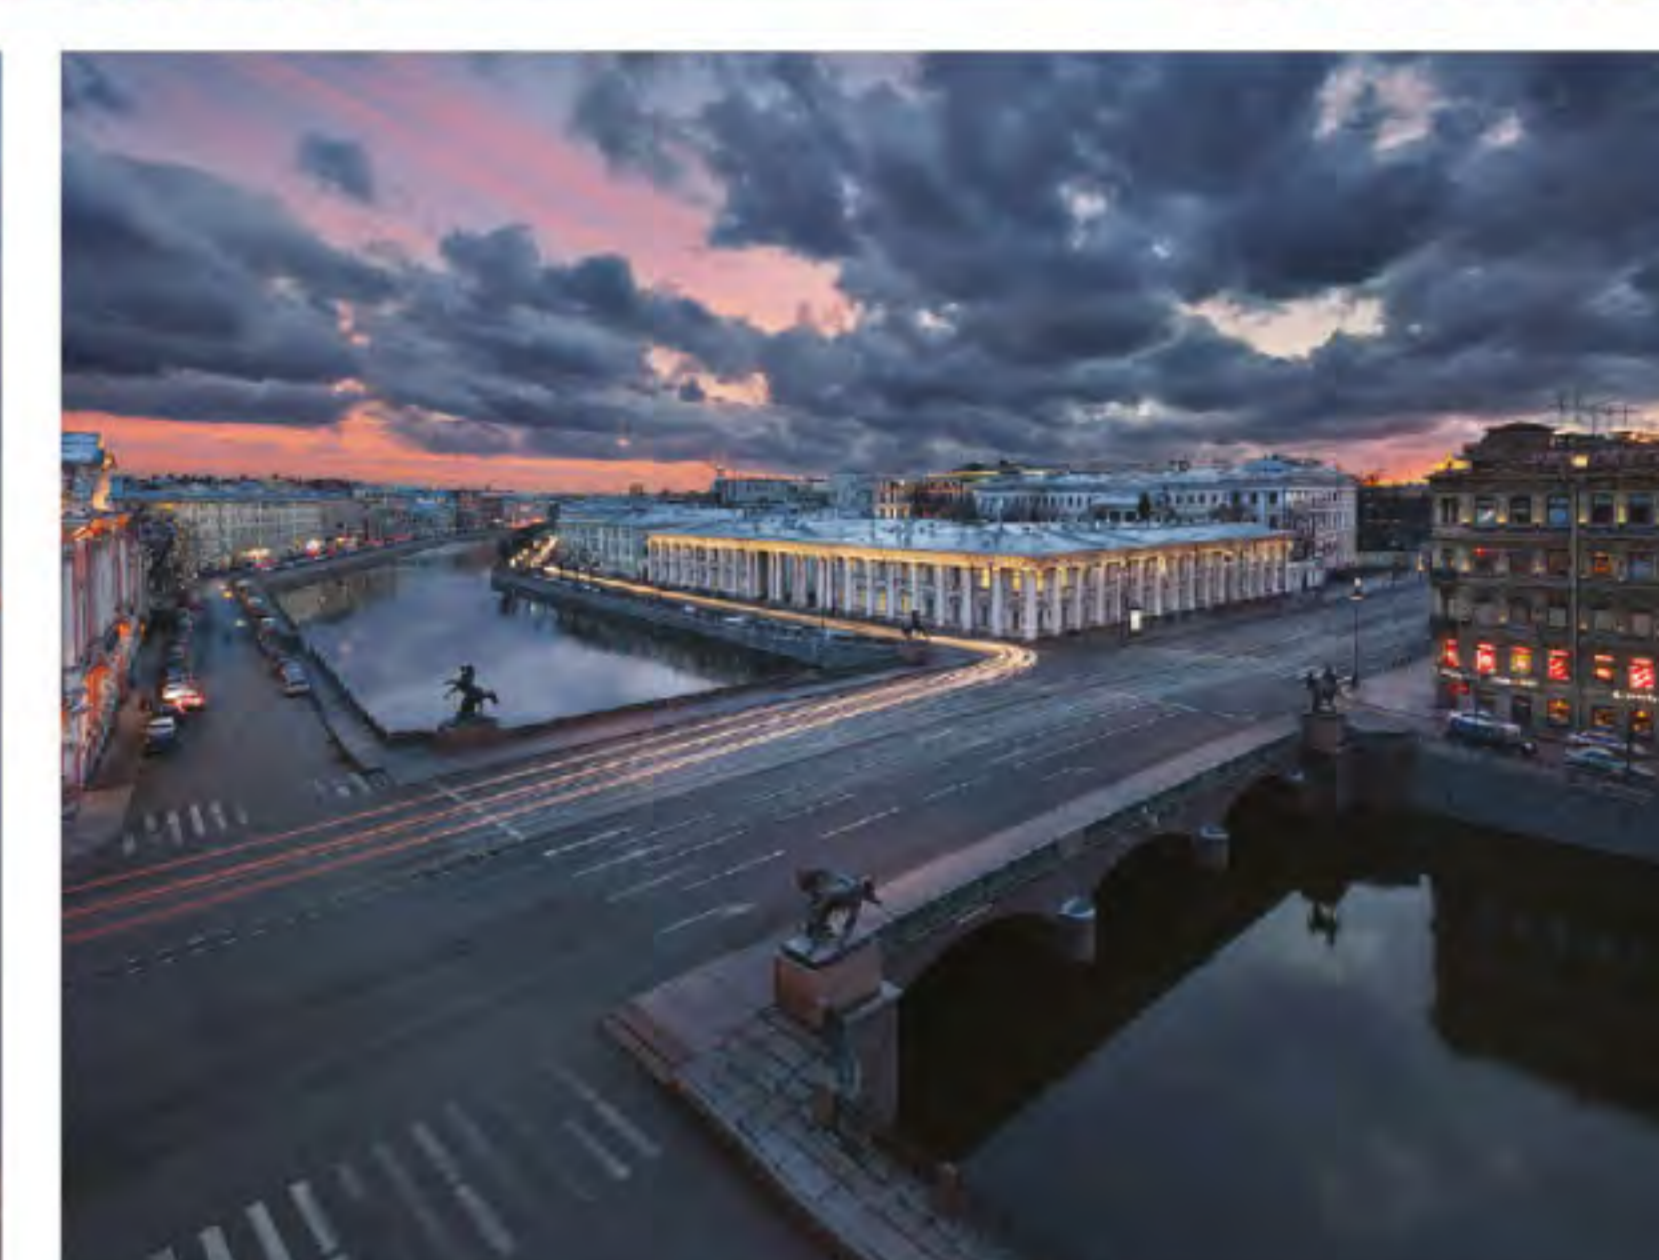

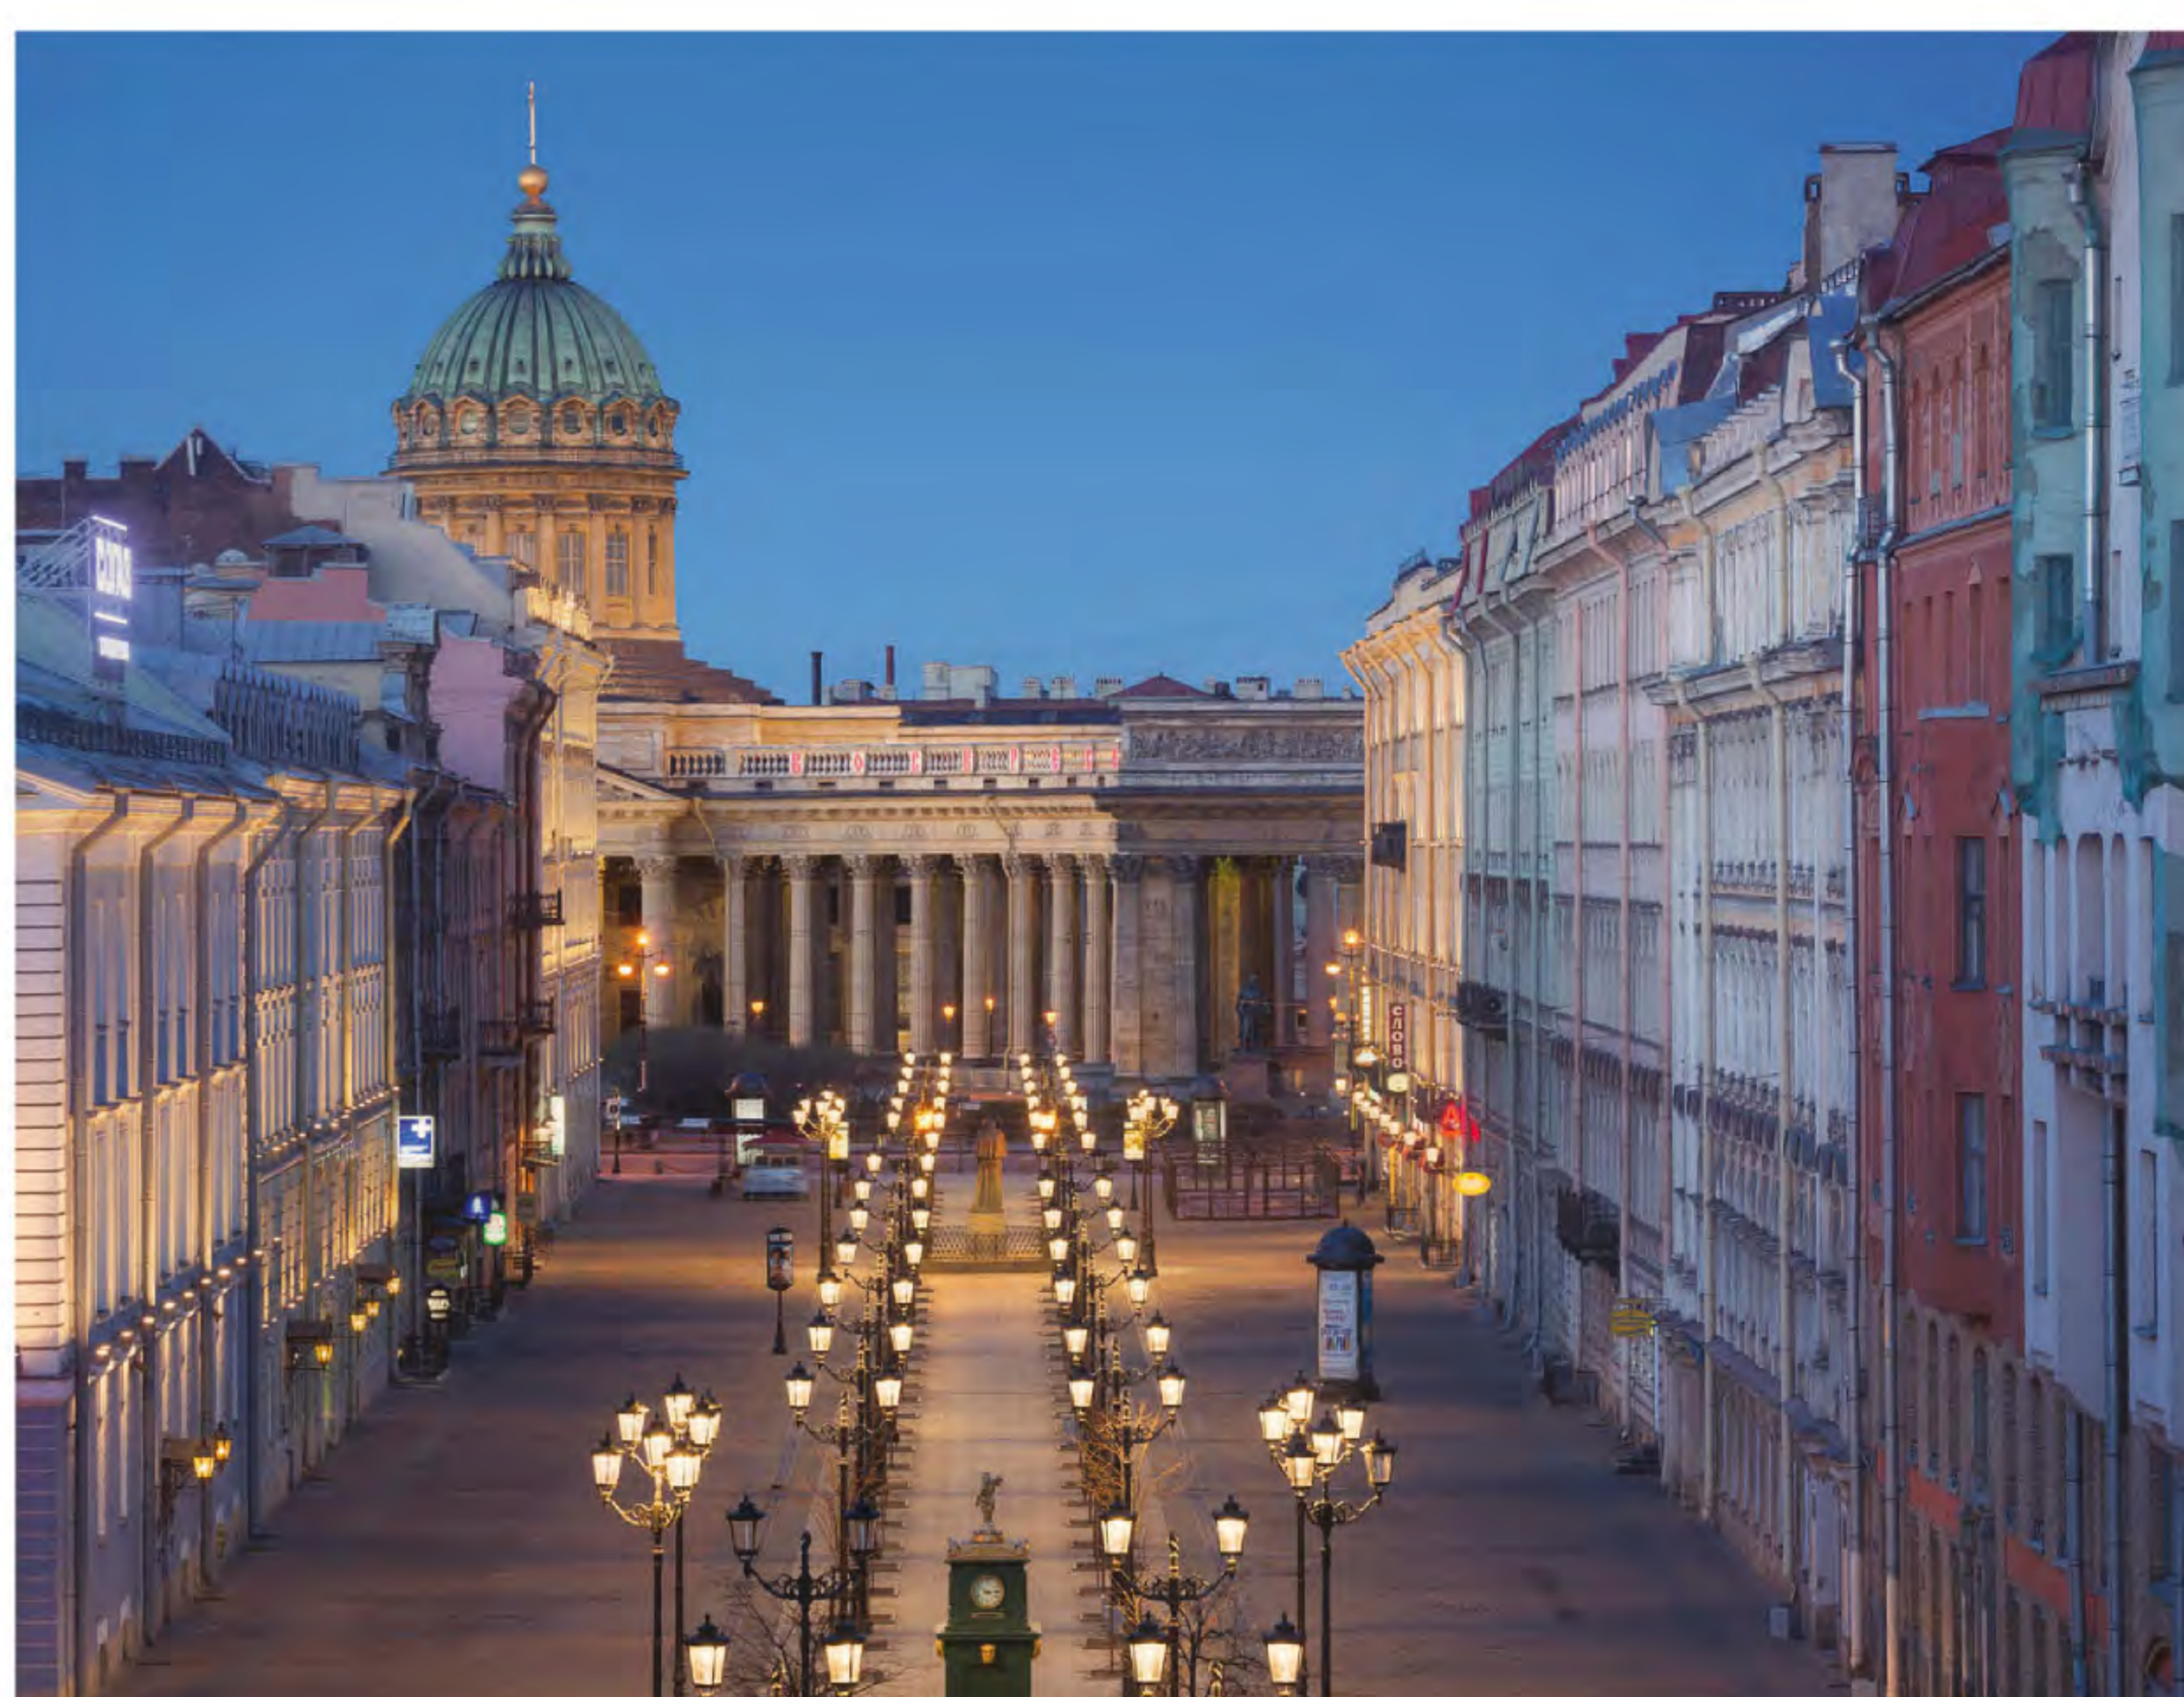

Saint Petersburg is a city of great traditions of landscape art. It has been created over more than three centuries by the best architects of its time on the basis of the principles of harmony of architecture and nature.

The ensemble unique in its sizes combines the water areas of the Neva, small rivers and channels, dozens of historical gardens and parks, squares and boulevards. Chef-d'oeuvres of the palace and park art such as Tsarskoye Selo, Pavlovsk, Peterhof, Strelna are the gems of the historical belt of Saint Petersburg suburbia.

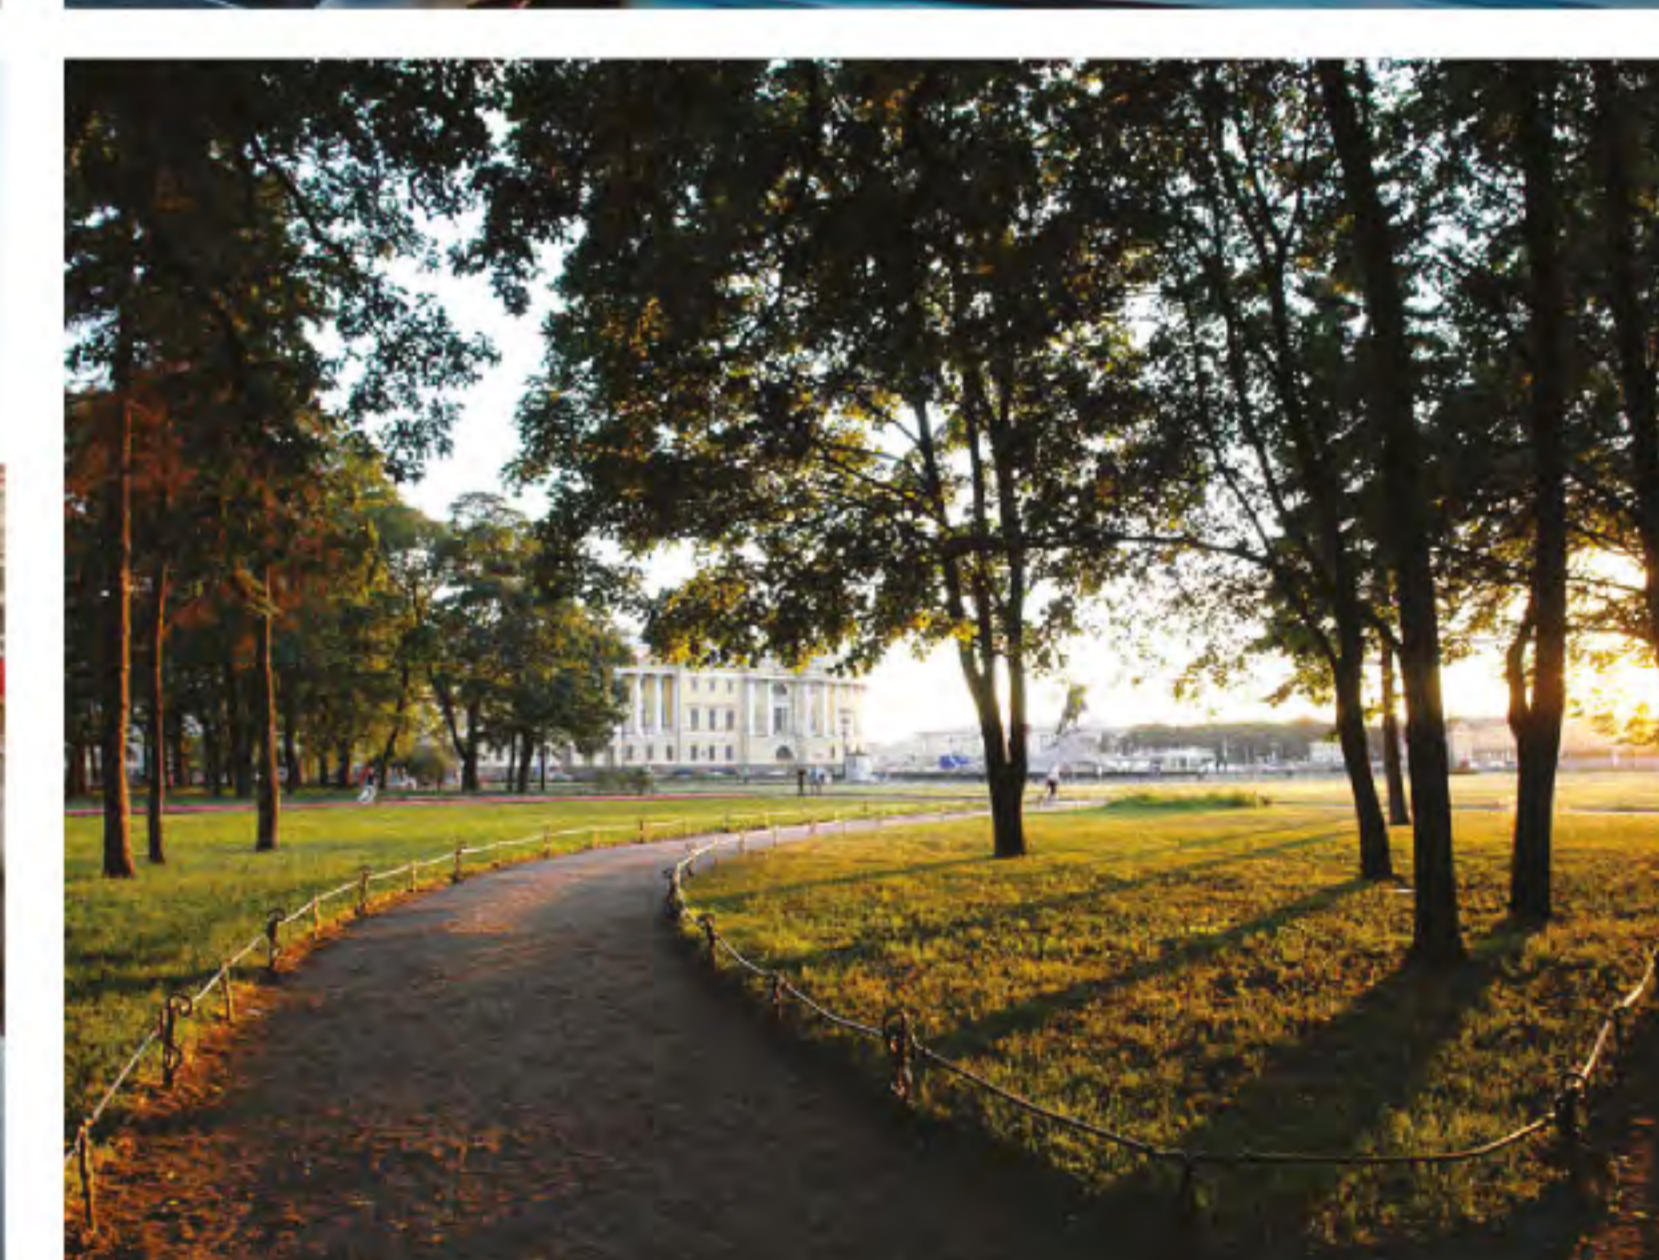

The treasures of landscape architecture are valuable objects of cultural heritage and attract to Saint Petersburg guests from all over the world.

### PRESENT TIME OF LANDSCAPE ARCHITECTURE

New strategies of the development of landscape architecture aimed at sustainable development of urban territories, ensuring high quality, comfort, attractiveness of the urban environment are being formed and implemented today in Saint Petersburg. The Conceptual landscape scenario of Saint Petersburg contributes to the efficient planning and carrying out of activities in this sphere.

Saint Petersburg has strongly proven a center for holding events at an international level, including in the sphere of landscape architecture. Among the largest events are the annual international festival Imperial Gardens of Russia, International Conference.

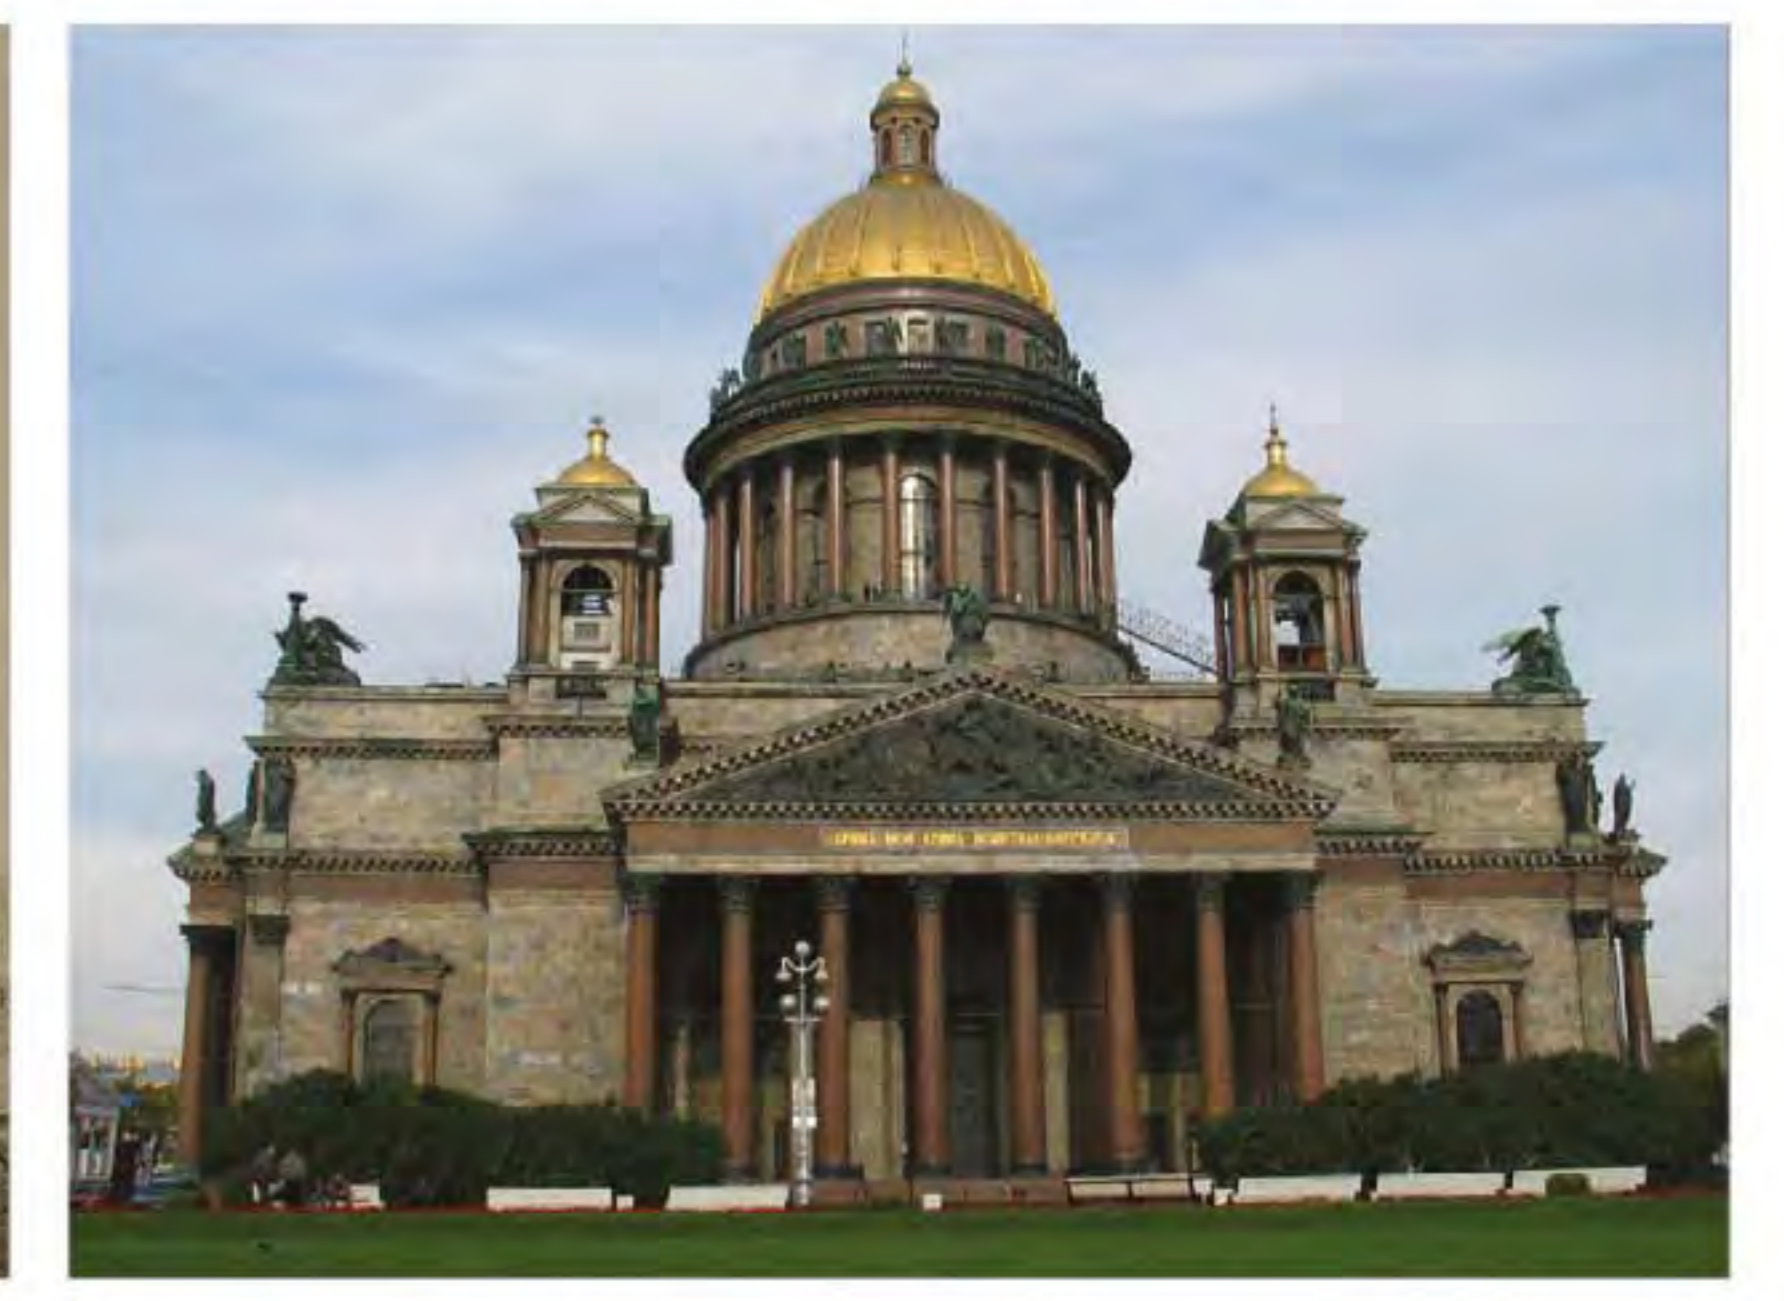

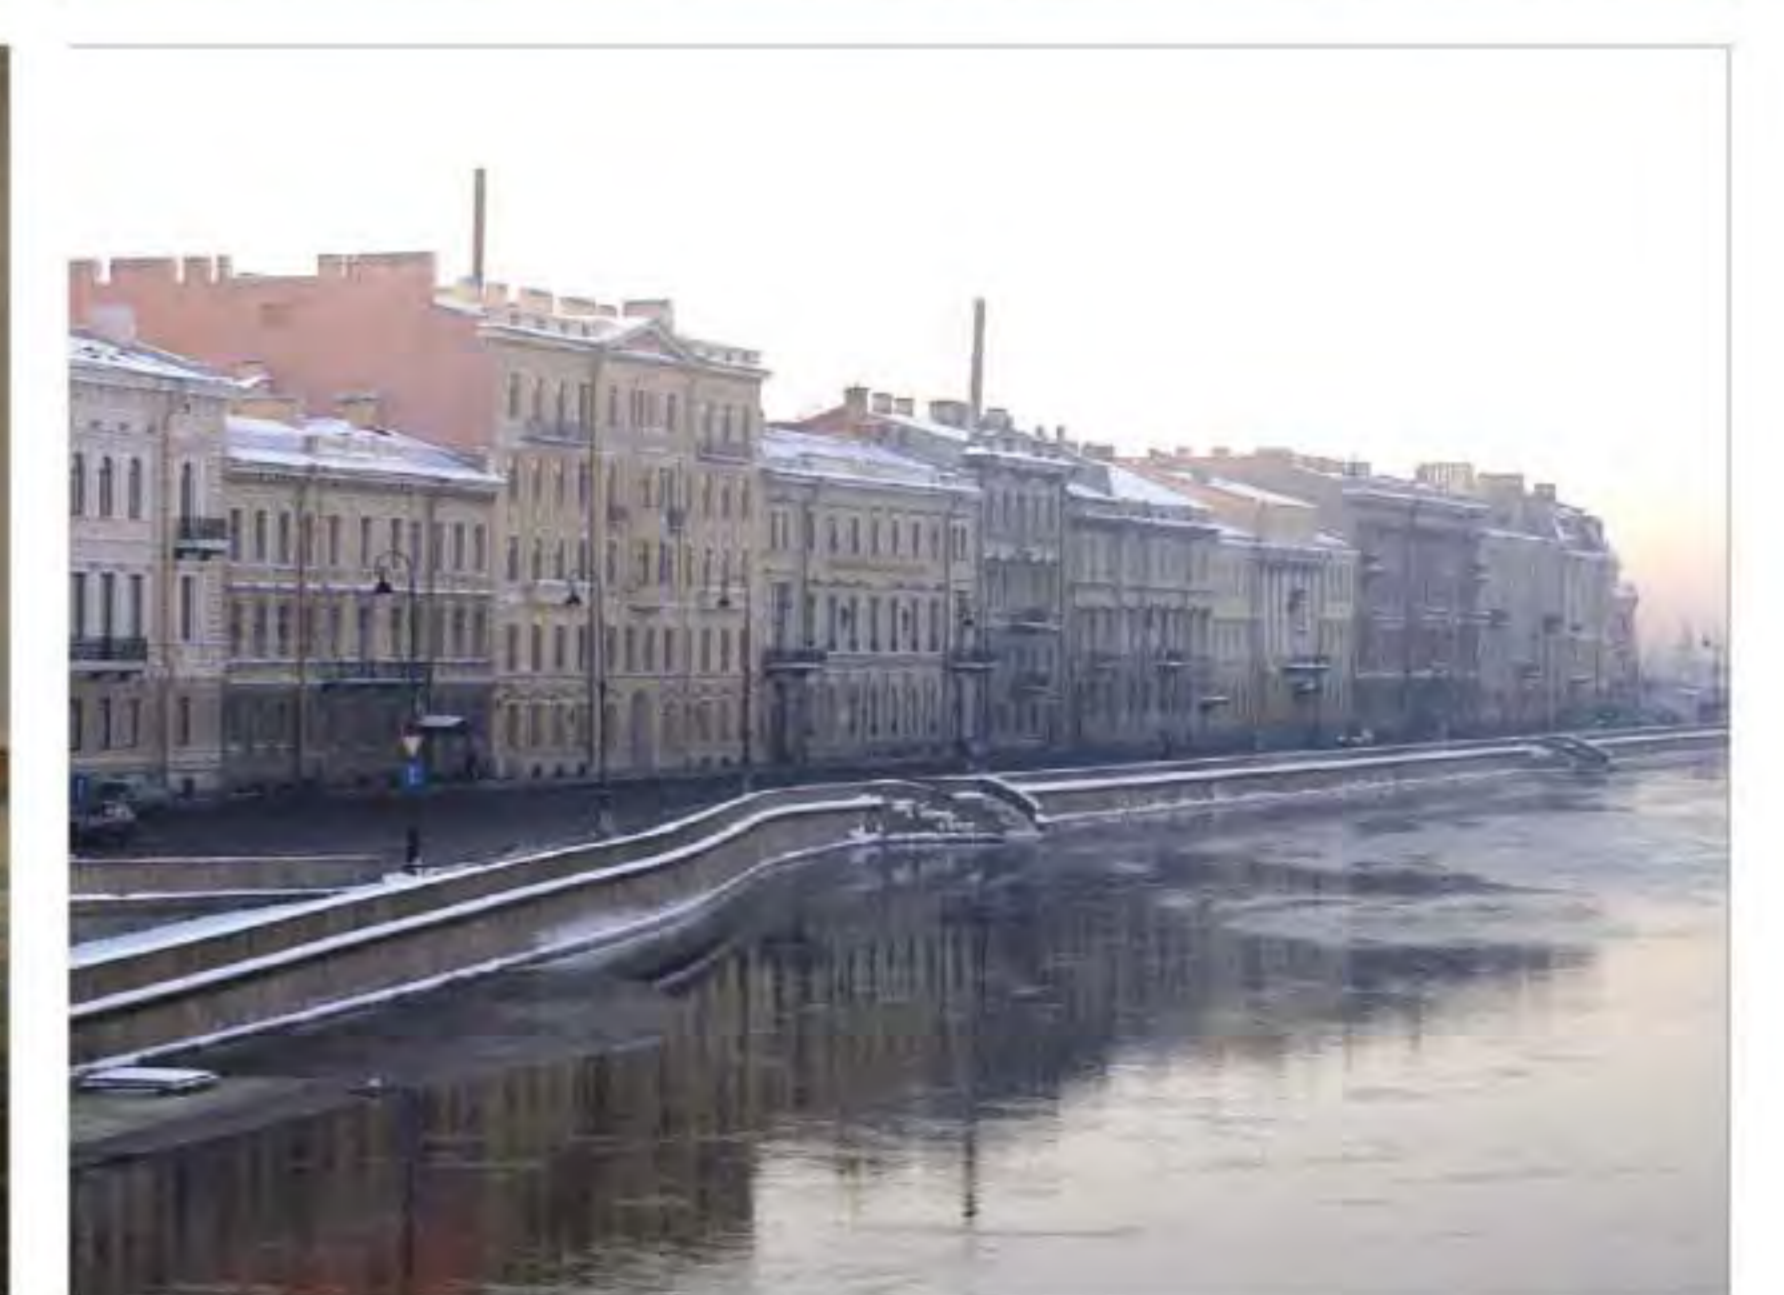

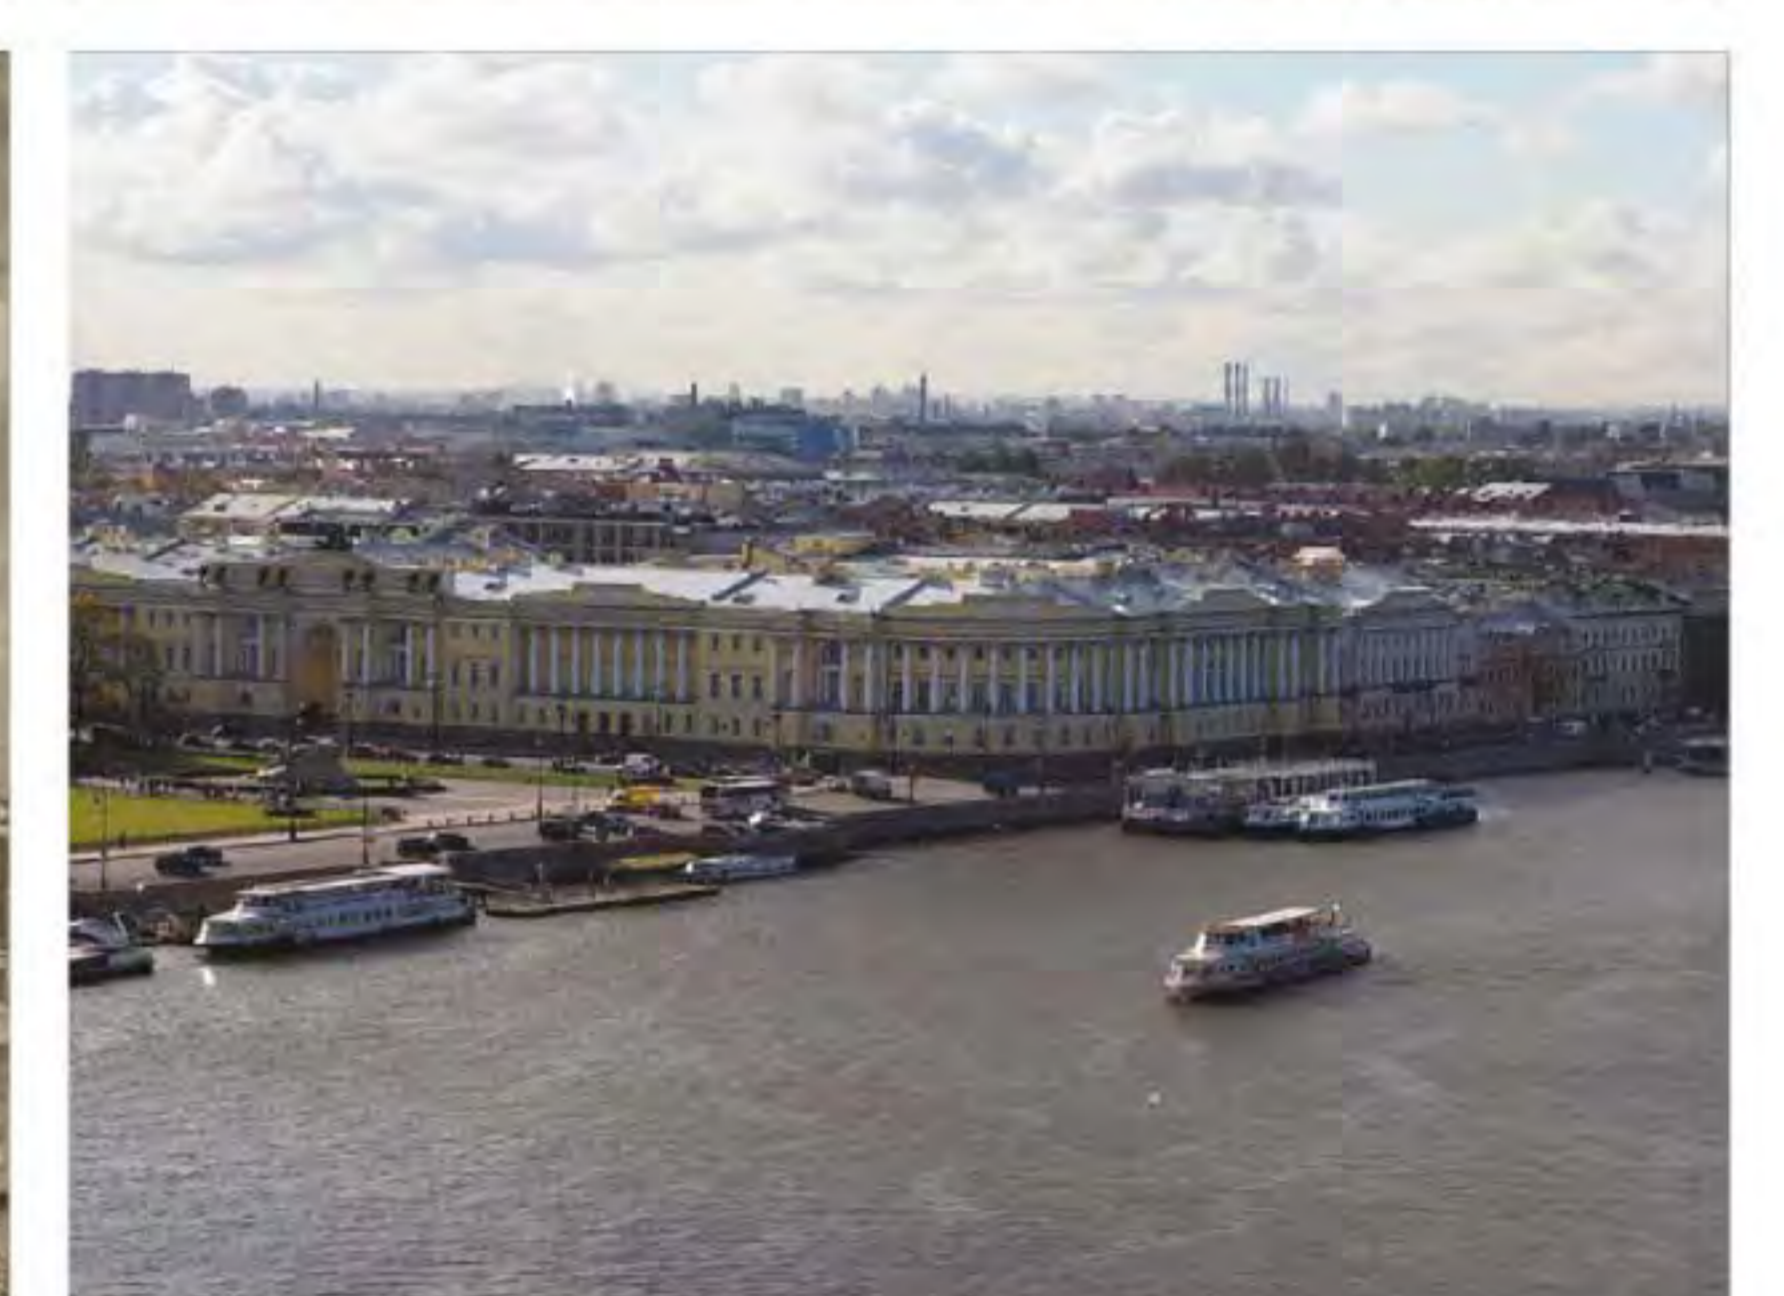

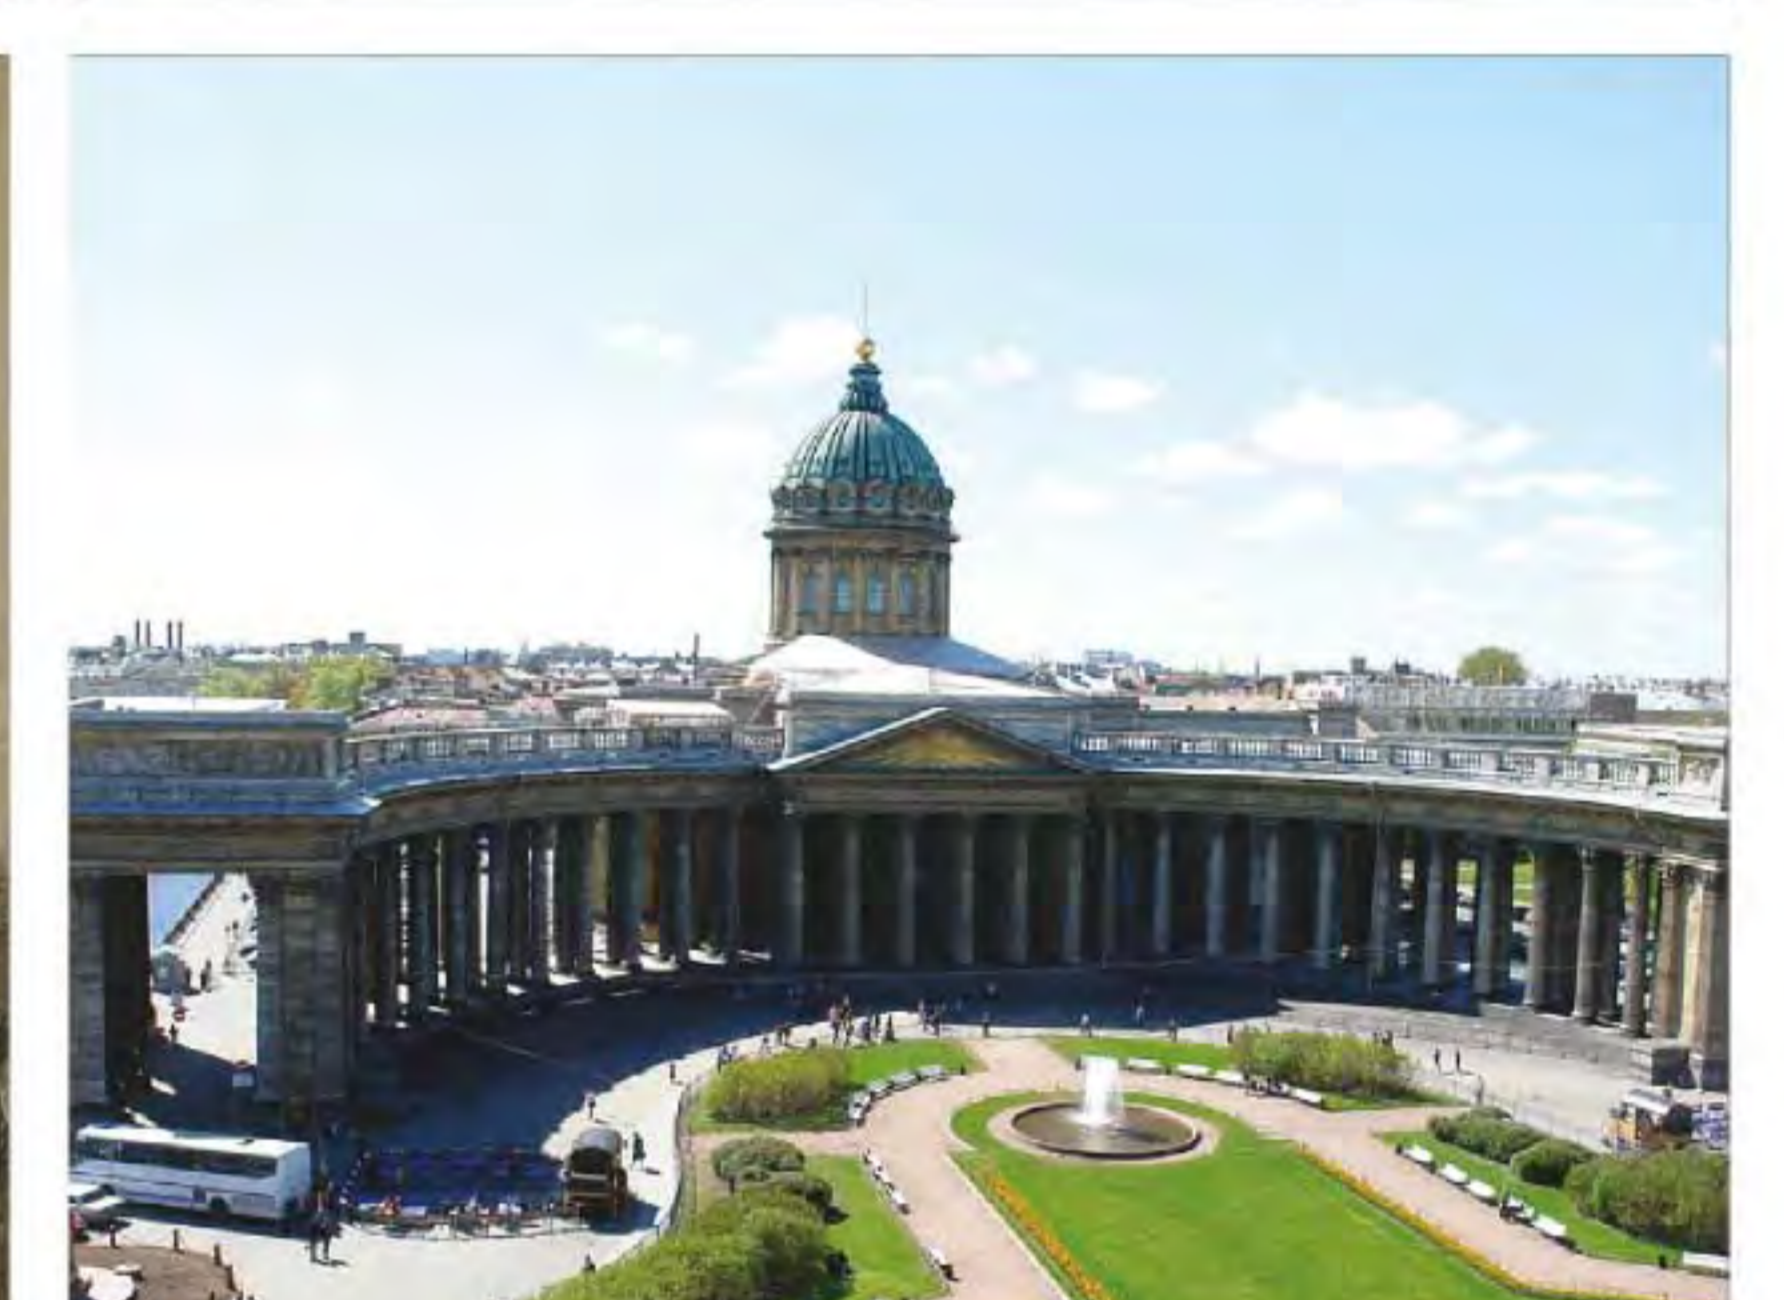

# New Holland: *cultural urbanisation*

## TRADITIONS OF LANDSCAPE ARCHITECTURE

New Holland has long been hidden away from the world. The austere grandeur of its arches and warehouses – the only elements visible to the outside world – have thus far constituted the architectural identity of the entire island, giving New Holland a reputation as one of the most romantic corners of St. Petersburg, while its inaccessibility has spawned legends of what lies beyond the red bricks.

From the moment of its founding, New Holland has been under naval control. The sizable territory has been used for maintenance of the Russian fleet: in one spot they stored lumber for ship-building, in another they constructed rows of warehouses, a water tank for testing ships and submarines, a naval prison and one of the first radio stations in the country.
